## History Live

an extension of  
CHF's Oral History Program

# The Changing World of Biotech

featuring  
**G. Steven Burrill**

in conversation with  
**Arnold Thackray**

Join us as renowned biotech investment guru and entrepreneur **G. Steven Burrill** and CHF chancellor **Arnold Thackray** explore the next frontiers of biotechnology. Burrill predicts that the United States will soon move into a “wellness care” system, based on a convergence of new technologies that improve outcomes for patients. As these changes occur, great portions of today’s health-care system will become obsolete, and new opportunities will open up for investment and research.

G. Steven Burrill is CEO of Burrill and Company.

Arnold Thackray is founder and chancellor of CHF, and CEO and president of the Life Sciences Foundation.

**April 11, 2012**

## Chemical Heritage Foundation

LIBRARY • MUSEUM • CENTER FOR SCHOLARS  
315 Chestnut Street • Philadelphia, PA 19106

*We tell the story of chemistry.*

New technologies flooding onto the health scene threaten major portions of the current health-care system with obsolescence. These and other developments will be explored in a **History Live** conversation with **G. Steven Burrill** as he explains the emergence of what he calls a “wellness care” system.

### April 11, 2012

5:30 p.m. Reception, Jacobs Reading Room

6:30 p.m. History Live conversation, Ulliyot Meeting Hall

7:30 p.m. Dessert and coffee, Jacobs Reading Room

Please register online at [chemheritage.org/events](http://chemheritage.org/events) by April 6. For more information contact Nancy Vonada, manager of events and donor relations, at [nvonada@chemheritage.org](mailto:nvonada@chemheritage.org) or 215.873.8226.

The April 2012 History Live event is generously supported by Montgomery McCracken Walker & Rhoads, LLP.
