

## **The Columbia Lighthouse Project**

is dedicated to improving suicide risk assessment prevention across all sectors of society. The suicide assessment method developed in collaboration with other academic medical centers, the Columbia Suicide Severity Rating Scale, is used extensively in education and healthcare systems, state-wide suicide prevention programs, the military, as well as academic and industry research in the US and abroad.

In order to help integrate the C-SSRS into your prevention protocols, we will:

- Help select the right screening tool and modify it for your setting
- Answer questions about how to use the tool and provide hands-on support
- Direct you to resources that can bolster your suicide prevention efforts

---

For support, copies of the tool, or additional information, please visit

*Identify risk. Prevent suicide. Together, we can make a difference.*

“We all have the potential to use the C-SSRS to save a life.”

– Keita Franklin, Director

U.S. Department of Defense Suicide Prevention Office

The C-SSRS has been endorsed, recommended, or adopted by:

Identify risk. Prevent suicide.  
Together, we can make a difference.
